Proletarians of the World, Unite!

About this journal:

Firstly, towards our readers and those comrades engaged in the communist movement, organization, and propaganda, and towards those worker comrades engaged in struggle against exploitation and oppression, we extend our deepest respect.

This journal has emerged in the midst of the spreading and intensifying flame of the global communist movement, in a context in which the world proletarian revolutionary faction’s regiments are all increasing at a rapid speed. In this environment, the groups of the proletarian class must encounter several problems, for example the lack of collective character, personnel, model experience, and more. These problems are in urgent need of resolution, and must be resolved in light of the present actual situation. In order to better resolve the problems encountered, we have established this journal to contribute a certain spirited force in dedication to the proletariat.

Up to now, this journal’s major focus is to publish on subjects relating to group construction, the propagation of communist thought, precautionary methods, analysis of the present situation, and more. The journal’s primary focus is to publish several essays of Marxist analyst. Overall, the subjects are to be essays beneficial for proletarian groups and as well as essays on methods and experiences of struggle.
