

ZIONIST KILLERS!

HANDS OFF THE PEOPLE OF PALESTINE!

Thursday, January 1, 2009

The Israeli Zionists once again are slaughtering the people of Palestine. With the complete support of the imperialists, both the US and European Union ones, are bombing and murdering the Palestinians in Gaza Strip after they had imposed for long time a blockade of starvation and genocide similar with the blockade that the Nazi had imposed in the Hebrew ghetto in Warsaw. The new terrorist and criminal action of the Zionists, aiming to wear down the heroic resistance of the people of Palestine, kills civilians and children, demolishes hospitals and institutes and threatens to invade Gaza.

What is taking place now in Gaza is a crime against all humanity. The goal is to subjugate the Palestinian Resistance and oblige the heroic people of Palestine to accept the deals directed by the imperialist for a state-ghost, a state-puppet under constant custody and control. If the resistance in Gaza is defeated it will become a serious defeat for all Arab people and all peoples that resist imperialism. The way will be paved for new interventions by imperialists and Zionists in Lebanon and other parts of the Middle East. Therefore the resistance in Gaza concerns all of us and directly it concerns the Greek anti-imperialist movement, the workers and youth that fight against the imperialist war and interventions.

The US imperialist along with the European Union are accomplices to this crime. The latter hypocritically maintains a stance of equal distance, making even the occupation with the Resistance and the killers with the victims but actually given, long ago, the green light for the genocide of the people in Gaza. In this crime participated also certain leaderships of Arab reactionary regimes that remain silent and they actually collaborate with the Israeli. The current and the previous Greek governments are also accomplices due to the strengthening of the relations with the state of Israel; they conduct joint military training and have signed many agreements of cooperation. At the same time by keeping equal distance they actually support the Zionist-criminals.

With our mass demonstrations let's condemn the murderous actions of the Israeli Zionists. Let's condemn their imperialist patrons who have armed and supported for years the murderous actions of the Zionists along with the cover provided by our country to the Zionist killers. With our mass rallies and marches let's demonstrate our rage both against the killers and everyone that supports and covers them. The crimes of the Zionists are also their crimes. Again and again in the streets to express our solidarity to the heroic people of Palestine.

With our mass demonstrations let's express our full solidarity to the heroic and militant resistance of the Palestinian people conducted for years and under the most difficult conditions in order to liberate their home-land.

The Communist Party of Greece (marxist-leninist) calls out an all-people's alert, the workers and

the youth, calls out to a continuous militant mobilization all the progressive people across the country.

With various activities, actual solidarity and mass demonstrations we demand the end of bombing, prevent the invasion in Gaza and end the blockade.

Send immediately urgent humanitarian aid and enforce the Greek government to provide health support and healthcare to the seriously wounded.

**The Resistance in Gaza must not be defeated!
The final victory belongs to the people of Palestine!**
