

Press Statement

[On the Mass Demonstrations against the Government, the European Union and the IMF]

The Communist Party of Greece (marxist-leninist) salutes the hundreds of thousands workers, youth, unemployed and pensioners who demonstrated their wrath against the barbarity of the measures promoted by the government and the imperialist European Union and IMF mechanisms, all over Greece. We stress on the unprecedented mass anger and determination of the workers to fight in order to overthrow the measures and oust the IMF and EU criminals who along with the local capital attempt to eliminate the social majority and the future of the country and its people.

Once again various provocatsia, undermining, disorientation and terror mechanisms were mobilized in front of the justified people's wrath that flooded the streets in every city in Greece. The apparent goal is to intimidate the people and block the flood of anger and struggle. Along with the media propaganda that lasted for months and miserably failed to persuade the people, along with threats and directives concerning the bourgeois legitimacy, at the same time with a huge police operation and threats there were also mobilized the undermining practice by actions totally alien to the spirit of today's great demonstrations. Every time that our people and the workers are attempting to rise and take their fate in their hands, to get rid from the political paternalism of bourgeois parties and stand independently defending their interests, forces and actions either blind or provocative provide a leg up or even the salvation pretext to the dominants, the government and the establishment. Already the government and the media are taking brutally advantage of the tragic death of three people in order to set up scenery of concert, fear and coercion.

They will not succeed! Workers and youth, by safeguarding their mobilizations will continue and escalate their struggles, strikes and demonstrations. They will not be disorientated by the provocations, they will not submit to the calls of national concert and the so called smoothness; they will not be dragged by the spirit of submission of the political leaders' council. They will mass the lines of struggle for the overall overthrow of the brutal measures and policies of the government, EU and IMF.

Athens 5/5/2010

Communist Party of Greece (marxist-leninist)
