United front of the peoples of Greece – Cyprus – Turkey against imperialism and foreign dependency

Ten years after the rejection of the Annan Plan by the Cypriot people the American imperialists and the dependent ruling classes of Cyprus, Greece, and Turkey return with a new plan worse in many ways than the last one.

The imposition of this new plan starts with the “Common Statement” of Anastasiades and Eroğlu which, with the support of AKEL, consolidates and legalizes the foreign occupation and the division of the island. It is a plan that does not provide any kind of independent entity, but perpetuates and legalizes the ability of Greece and Turkey to intervene in a decisive way on the island. And through them gives the imperialists the ability to keep this new “state” abomination as hostage. It is a plan that works as a wedge in the western European plans for greater intervention in the island and the region.

The Cypriot people are the victims of these imperialist antagonisms. Along with the peoples of Greece and Turkey they must say again NO to the imperialist plans and their subordinate bourgeoisies. The peoples of Greece, Cyprus, and Turkey need to fight together against the imperialist organizations (NATO, EU), against foreign bases and interventions.
