

Let's boycott the parliamentary elections sponsored by imperialism!
Let's constitute an Independent United Government!!

Appeal of the Revolutionary Communist Party of Nepal

The puppet government led by Sushila Karki, the agent of US imperialism and Indian expansionism, has announced that it will hold parliamentary elections on March 5, 2026. This election is a stratagem concocted mainly by US imperialism to further reinforce its hegemony in Nepal by legally making the reliable old agents of the parliamentarian political parties and the new agents born under the guise of the Gen-Z rebellion the trusted contractors of the Nepalese regime. At this time, both the old and new agents are vying to gain the blessings of imperialism and expansionism to attain power through this election. On the other, the workers, peasants, and the general oppressed classes, nationalities, genders, and regions, along with patriotic, progressive leftist political parties, are not optimistic that the government formed through this election will solve the problems of national independence, democracy and people's livelihood.

The aforementioned problems that the country and its people have been facing for a long time have remained unresolved, not because there were no elections prior to this. Why did the parliamentary elections held in 1959, the elections held during the entire Panchayat period, the referendum held in 1980, the parliamentary elections held under the constitutional monarchy after 1990, the two Constituent Assembly elections held in 2008 and 2013, and the parliamentary elections held after the founding of the Federal Republic of Nepal in 2015 fail to resolve the problems? Why did the problems of national independence, democracy, and people's livelihood become even more severe after all these elections? The condition of the country and its people will not improve after the upcoming parliamentary elections without seeking answers to these questions, but will instead become more severe. This is a proven fact of history.

The Nepalese people have always supported the struggles led by political parties. But the irony until today is that the leadership, under the pressure of imperialism and expansionism, has finally compromised with that very force against which the people struggled. After those struggles, some faces in the government changed, but there was no change in the Nepalese state power. This is the reason why all the people's struggles from 1950 onwards have not yielded results that people expected and the country needed; on the contrary, the problems have become even more grave.

The root cause of the problems faced by the Nepalese people is the reactionary state power that protects the interests of mainly the US imperialism and Indian expansionism externally, and those of the comprador and bureaucratic bourgeoisie and the feudal classes internally. This state power has been suppressing the Nepalese people to protect the interests of these two types of enemies. It is the scientific socialism expressed in the leadership and dictatorship of the proletariat, after crossing the threshold of the new democratic revolution manifested in the dictatorship of the oppressed people led by the proletariat that will solve all the problems the country and the people have been confronting, and the people will become the masters of the country. It needs a tough and principled struggle.

In view of this situation, our party's position is that the constitution of a national political conference of all political parties, organizations, groups and individuals opposed to imperialism and expansionism; dissolution of the current puppet government; formation of an independent united government from the said conference; and writing of a new constitution based on the Federal People's Republic of Nepal is the instantaneous political way out, and in line with this, party has decided to boycott this election, for it brings the agents to power and thereby further consolidates the grip of US imperialism and Indian expansionism in Nepal. In this situation, our party sincerely appeals to all patriotic, progressive, leftist political forces, including the entire workers, peasants, low-paid employees, and small and medium businessmen, as well as the national bourgeoisie, to forcefully boycott the upcoming election and prepare the ground for the formation of an Independent United Government through the boycott movement.
