Letter from DFLP to political parties and societal forces in the world

(Crimes continue in the Gaza Strip... and the number of massacres rises to about 600)

Until the moment of preparing this letter, the Zionist occupation aircraft and artillery were attacking the homes of Palestinian civilians in the Gaza Strip. The aggression launched by Israel since October 8 has led to the martyrdom of about 5,500 martyrs, 66 % of whom were women and children, with thousands of martyrs and wounded remaining under the rubble due to the difficulty for civil defense crews to reach them due to the continuing bombing operations.

According to official statistics, the number of wounded exceeded 20,000, and the number of completely destroyed housing units reached about 20,000 housing units, while the houses that were partially destroyed amounted to 181,000 housing units that are no longer fit for habitation. 177 schools were also subjected to various damages, including 32 schools that were out of service... in addition to the destruction of hospitals, health centers, headquarters of international organizations and media outlets, mosques, churches and bakeries...

In light of its inability to confront the resistance factions, Israel resorted, as every time, to targeting the popular incubator of the resistance by targeting all civilian facilities, and committed dozens of massacres in various parts of the Gaza Strip. Within a short period, the Israeli forces committed about 600 massacres, and the average number of martyrs in each massacre reached 50, and some families were permanently deleted from the records department and no longer existed. One of the most important of these massacres was the massacre of the National Baptist Hospital, which included more than three thousand displaced civilians who had been displaced from their homes, a large portion of whom were displaced from the northern Gaza region, where the occupation asked them to leave... within the framework of the mass displacement plan.

Despite the promises made to the administration of the hospital, which is run by the Anglican Episcopal Church, and the reassurances provided by the International Committee of the Red Cross, which prompted civilians to resort to it, Israeli missiles were waiting for them, and as a result of the direct and intentional Israeli aggression, about 500 martyrs fell, in one of the... The largest massacres committed in the history of the conflict.

Israel claimed that it had nothing to do with the attack, and that the missile that hit the hospital was fired by the Palestinian resistance. This is a clear lie confirmed by the testimonies of hundreds who may have been present at the scene when the hospital was hit. The denial of the Israeli authorities does not change the reality of the responsibility borne by the enemy army for the following reasons:

- The state of confusion among the Israeli political and military institutions, and their failure to provide a unified account of what happened.

- The resistance factions confirmed that they did not fire any missiles at the moment the hospital was targeted, in addition to not possessing this type of destructive missiles.
- Many Western media outlets, including American ones, are skeptical about the Israeli story. Some weapons companies also confirmed that the hospital was targeted with bombs that only Israel and the United States possess. The matter may have been coordinated with the American Secretary of Defense, who visited Israel and held a joint meeting with Defense Ministry officials. A week ago, the aim of the Israeli attack was to coordinate offensive operations against the Gaza Strip.
- The enemy army or any of its allies did not provide, either via photos, video, or via satellite, anything that confirms their story, despite their possession of advanced and modern monitoring devices classified as the most powerful in the world. Many countries have requested to provide physical evidence that confirms the validity of the Israeli story. However, the US Department of Defense was content with general statements.

The American President adopted the story presented by the enemy army, even before he verified it. He had previously adopted the Israeli narrative that the Palestinian resistance kills children and beheads, before the White House returned and confirmed that the president's information was inspired by a phone call with Netanyahu and based on Israeli reports.

What has become certain is that the American administration and some Western countries are speaking on behalf of Israel and the Zionist movement, and they realize that the data presented to them was formulated by the Zionist media, which is accustomed to presenting and fabricating false narratives, so the victim becomes the executioner and the executioner is a victim, and this is what confirms Some of the Western and American mind in particular has become programmed with the backgrounds of Zionist propaganda based on the myths and legends of the Zionist movement that intersect with the interests of Western colonial countries, even if the cost of that is committing crimes, assassinating the national rights of peoples, and attacking all the values of democracy and international law.

The military fleets that came to protect the Zionist entity will not intimidate us, and will only increase our people's resolve and belief in the justice of their cause. This confirms the reality of full partnership in the aggression by the Western countries supporting the aggression, and this is a message that the battle of Gaza is the battle of all free people in the world, facing the colonial alliance. And Western fascism, which continues to follow misleading and false Zionist propaganda. But despite this, the Western Israeli aggression will not intimidate us and will not change the compass of truth, which will remain bright in the eyes of the free people of the world who stand today in the streets and squares and shout in support of Palestine and in rejection of the aggression against the Gaza Strip.

We call on all parties, forces, organizations, and free people in the world, and every person of good conscience, to continue making efforts for positions supportive of the Palestinian people and their resistance, and for popular movements that reject the aggression and pressure the governments that support the occupation and aggression to stop their bias, respect the principles of justice and international law, and support the right of the Palestinian people to self-determination. His destiny is free.
