

## **NO INVOLVEMENT OF OUR COUNTRY IN THE WAR OF LIBYA! - NO NEW HUMAN SACRIFICE FOR IMPERIALISM AND THE CAPITAL!**

In a critical escalation of the country's involvement in imperialist wars in the region, the government is "raising the hand" for the immediate involvement of the Greek army in the Libyan civil war. This development, accompanied by the respective phraseology ("shed our blood again for our allies"), is a submission memorial to imperialism and to the conversion of the country into a part of the planet murderers. They mean for the youth to shed its blood on behalf of the imperialist bosses and their subordinates.

Any "mantle" of these operations (supposedly a "peace" force, to "stop the arms embargo") is nothing more than a millennial lie. As in the past, the famous "peace" interventions that fragmented countries. Such an intervention by NATO imperialists disintegrated Libya ten years ago and caused an endless civil war. If the government of ND or the opposition of SYRIZA were so concerned that weapons did not reach other countries and people were not killed, they should close NATO's military bases in our country. Those that have been extended by SYRIZA, and will be extended even further, with the agreement brought by ND to the parliament! These bases of death are responsible for all this bloodshed throughout the Middle East region, the South-East Mediterranean and the Balkans. The only thing that will be achieved by the eventual involvement of the Greek army in Libya is to scatter death, to ravage its people, to further fuel the civil war, to create more refugee and migration flows. To transform Libya into a new Syria.

Furthermore, the involvement of Greece in Libya brings war from our region to our country. It will escalate all competitions, especially those between the bourgeois classes of Greece and Turkey, which compete in order to win the favor of the imperialists (US-EU-Russia), in order to gain "points" against each other. And they do not hesitate to send the children of the peoples and workers, those who they destitute and impoverish, to kill and be killed in order to earn those "points". Hoping to be able to ask for "exchanges" against each other, on the issues of EEZs and maritime borders. Bringing even closer the possibility of a dangerous Greek-Turkish escalation. This is also the content of the alliances between Turkey and Greece with the warring parties of the Libyan civil war.

None Greek soldier has a job in Libya, to be sacrificed for imperialism and the capital! No part of the country should be used for the imperialist war! The place for our youth and people is on the road, to build an antiwar-antiimperialist movement! To stop the wars and slaughterhouses of people. To prevent the arson of our area!

- NO INTERVENTION OF THE COUNTRY, DIRECT OR INDIRECT, IN THE WAR OF LIBYA!
- NO SOLDIER OUTSIDE THE BORDERS!
- CLOSE THE NATO BASES OF DEATH!
- NO TO THE NEW AGREEMENT USA-GR FOR THE EXPANSION OF BASES!
