### Kangleipak

(Marxist, Leninist and Maoist)

Ref.No..243/KCP-Chq/2011

Date..25./01./2011

### Press Release

Six decades after the Constitution was adopted and the Republic was declared, the whole ruling system has become out-rightly reactionary, anti-people. In the colonial states of the India, millions of people are denied elementary freedoms and independence is reduced to a sham – the real economic decisions are taken by the big marketers like the prices of goods including essential commodities has stick by the migrant businessman in Manipur. When increasing number of people are resisting human rights violation, displacement, price rise and loot of natural resources, they are brutally suppressed unleashing state terror and imposing black laws like AFSPA and UAPA. Even sedition charges are imposed and jail under National Security Act (NSA). It is in this context the Kangleipak Communist Party (Maoist) had launched a protest with the revolutionary minded people and democratic forces as a mark of boycott the India's Republic Day celebration on the eve of India's republic Day at various part of Manipur. People also burn down the Indian Constitution by holding placards like "Long Live Maoism", "We boycott the India's Republic Day Celebration" and "Long Live Manipur". Such initiative is a good beginning of the way of Maoist movement in Manipur. The purpose of participation of general public in such protest will developed transitional demands of the revolutionary movement. The program of transitional demands will act as a bridge between the partial struggles and the struggle for socialist revolution or national liberation movement. These demands are both the most effective way to resist the colonialism and a challenge to the essence of the system itself. So once again would like to appeal all the section of people to avoid participation to the so called republic day.

The first period of imperialism meant the division of the world amongst colonial powers. After the Second World War, when the "American century" began in earnest, the colonial empires fell apart to be replaced by formally independent states. The United Nations Organization also works as a supermarket of the so called government control NGOs. So there is a way only to way out from the colonialism is Communist movement. The chains of economic dependence are forged from colonial social relations and can only be smashed by the expropriation of colonialism itself. The KCP (Maoist) believed that a popular mass movement led by the Maoist way of thought can be defeat the colonial regime. Mass forces are needed. Therefore, we will fight for the mass movement of the oppress people to create organized peoples army. These are the first steps towards the formation of a Maoist and popular militia – an organization essential for the defense of our nation today, and for its victorious revolutionary offensive tomorrow. Since 1980's, more and more oppressed nations, racial and ethnic groups and indigenou peoples, have demanded freedom from oppression and domination. The compulsory unions of peoples such as the former USSR or Indonesia have either broken up or are beginning to do so. Compulsion or oppression of any kind stands in the way of international solidarity. The working class, peasant, radical youth and popular masses must oppose all form of violations of national rights and we must fight for the right to self-determination. We appeal all the Civil Society Organizations (CSO), students unions, youth fronts and women organizations to consider this program as an immediate struggles of the oppress people of Manipur to address the immediate needs and challenge the power of the imperialist as a whole. There is basic need the CSO's, Students Unions, radical Youths and women groups to come to the head of the fight for democratic rights as a means to an end – the abolition of colonialism and the establishment of classless democracy and socialism.
